Applications

UTILIZECORE MOBILE APP

UtilizeCore is a B2B network-based SaaS platform automating the service supply chain by enabling SaaS subscribers to procure subcontractors and deliver quality service anywhere at any time. It provides a next-generation platform to service companies to simplify integrated property and subcontractor management.

UTILIZECORE INTEGRATION

The UtilizeCore Integration project bridges the core field service management capabilities of UtilizeCore with third-party platforms such as QuickBooks Online (QBO), Sage Intacct, and offline mobile systems. It enables seamless synchronization of Work Order, Clients, Vendors, and Invoices, ensuring operational continuity across field techs, accounting, and asset tracking systems.

- Designed and deployed integrations using Prismatic.io to connect UtilizeCore with third-party services such as QuickBooks Online (QBO), Sage Intacct, IFS, and Slack.
- Built and maintained event-driven workflows, data mappings, and webhook handlers across multiple tenants using Prismatic's low-code and custom code components.
- Implemented data transformation, error handling, and retry logic for asynchronous invoice, inspection, and equipment syncs.
- Developed and tested custom Prismatic components in Node.js to extend platform functionality for industry-specific use cases.

FAMILY TRACKER & SOS

Developed an app to enhance family safety through real-time location sharing, instant messaging, and emergency SOS functionality. Features include GPS-based tracking, notification systems, and multi-platform compatibility.
